

NHP

The all-new Delta DC Wallbox 50kW and 72kW

NHP is excited to present one of the world's slimmest and most practical electric vehicle chargers in New Zealand.

The all-new Delta DC Wallbox offers a compact design, perfect for wall mounting. A designer floor mounted stand is also available, which has a footprint of a mere 0.16m².

The Delta DC Wallbox 50kW features dual CCS2 plugs as standard, allowing you to charge one vehicle at up to 50kW, or two vehicles at up-to 25kW. To further enhance this exciting product, the Delta DC Wallbox is also available with a 72kW output, allowing up to three vehicles to be charged at once utilising its third AC 22kW Type 2 plug.

Speak to NHP's EV team today on the benefits of this next generation charger. NHP also offers great value extended warranty, service and maintenance packages which will keep your charger running year after year.
