

# Powering your healthcare facility

Keeping the heartbeat of your medical facility in excellent health.

# Knowing what's at stake

When it comes to power critical applications, ensuring maximum immunity to electrical network disturbances can be the difference between success and failure.

In high demand, power-critical environments such as medical facilities, the reliability of equipment hinges on solutions engineered to address:

- Reliability and continuity of power supply
- Long term sustainability and energy efficiency
- Compliance with legislation, standards and codes
- Optimised life and lifecycle management costs
- Risk identification, minimisation and mitigation
- Local availability of parts and maintenance services
- Facility, personnel and patient safety

## Understanding through experience

In managing your medical facility peace of mind can be gained by selecting partners who understand the complexity of your operating environment, deliver specialist expertise backed by high quality products and services, and, provide responsive support that you can rely on each and every time.

Your chosen partners will help you navigate the complex web of stakeholders within your organisation as well as engaging with consultants, government bodies and industry regulators. With 50 years of electrical and engineering industry excellence and 49 locations across Australia and New Zealand, at NHP it is our local people and footprint that helps us understand your specific project needs, no matter how big or small. It is this extensive industry experience that helps us understand your health care facility needs.

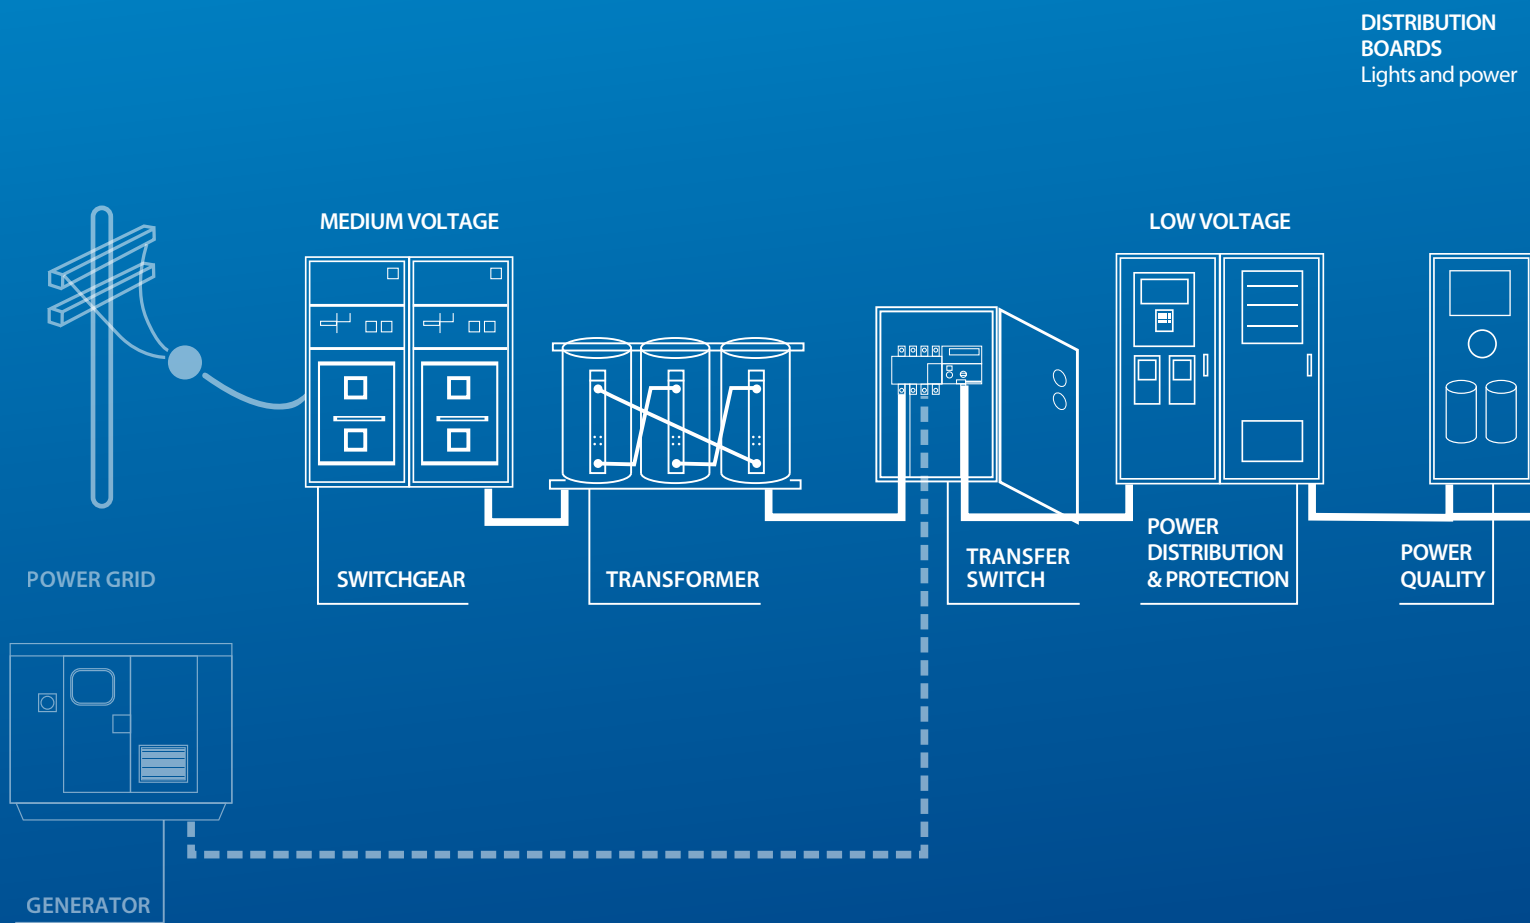

# Application specific solutions

Together, with our global supply partners, we understand the problems you face. We can offer complete solutions, from Power Distribution, Energy Management & Control Systems through to products for protection of personnel.

We work closely with you to identify and address challenges such as continuous electricity supply, energy efficiency and asset lifecycle management.

Our expert teams partner with you to ensure our solutions are tailored to maximise uptime, reliability and continuity of power supply as well as optimising long-term serviceability.

## Complete lifecycle support from a partner you can trust

Bringing together the expertise of our Specialist Engineers and global partners, NHP is here to help you throughout the entire lifetime of your facility.

From project scoping and concept design through to installation, commissioning, servicing and repairs we work collaboratively with you, your teams and your stakeholders.

Our goal is to ensure that your project meets the most stringent industry standards, project timelines and your budget.

## NHP – the local choice powered by global partners

When you use NHP you are assured of reliable, quality power.

As the largest independently Australian owned supplier of power distribution and protection, energy management and control systems our involvement in your project is focused on the long term.

We are here to actively support you with product and technical solutions during the lifetime of the project in addition to offering you a 24/7 technical support service with spare parts availability and on-site training for engineering and maintenance staff.

In your local community, city and industry, we understand your specific project needs.

Choice in product, technology, service, and support enabling you to customise and push boundaries.

With a global network of suppliers, we bring the world's best products and knowledge to your doorstep.
