CONDITION MONITORING SENSORS

Component type	Sensor for vibration control unit
Range	1442
Model	N/A
Product status	Existing

The Allen-Bradley 1442 Eddy Current Probe is an advanced and reliable industrial sensor providing highly accurate and precise measurements of conductive materials. Fitted with the latest technology and innovative engineering, this eddy current probe is a cost-effective solution for a wide range of applications suited for shaft vibration, phase/speed reference and rotor/thrust position measurements on industrial machinery with a linear range of 0.25mm to 29mm.

DIMENSIONS

Diameter	8 mm
Length	120 mm
