Allen-Bradley Micro850 Controller 28DI 20DO Source Ethernet
RS232/485 24VDC

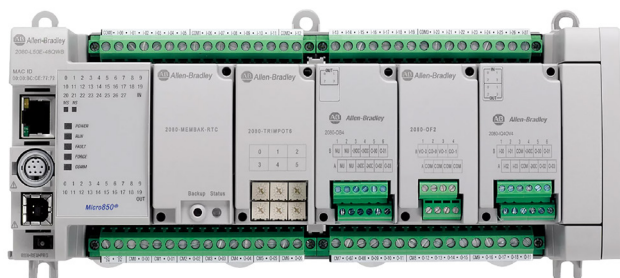

MICRO CONTROL SYSTEMS

Allen-Bradley

Component type	PLC CPU-module
Range	Micro 800
Model	850
Product status	Existing

Allen-Bradley Micro800 controllers offer both a scalable and robust micro control solution for small to large standalone applications and allow for customisation and flexibility. You can elect from a wide range of plug-in modules to match your requirements and make use of Connected Components Workbench™ software to help reduce machine design time and maximise productivity.
